

Containerships is a full-service logistics company providing safe, fast and environmentally friendly door-to-door container transportation in the Baltic Sea, North Sea and the Mediterranean. We offer both standard and customized containers and a complete coverage of logistic solutions by vessels, trucks, rail and river barges.

We are an international, yet local logistics company, and our 15 own offices and six agents across the operational area ensure the high service level which has become one of our assets down the years. Currently, Containerships employs more than 600 people in Europe, Russia, Turkey and Northern Africa.

With our highly professional staff, special equipment and efficient operations in co-operation with selected partners we provide seamless and on-time logistic chain from door to door. With over 50 years of experience in the industry, Containerships has become known as a forerunner of the Baltic Sea. In 2018, we will be once again front runner in short sea logistics and launch Europe's first LNG-based logistic supply chain. Please find more at www.containershipsgroup.com

We have 15 years of experience in Latvia, and due to expansion, we are **looking for new colleague** to join our team in Riga.

If you are accurate, love numbers and can understand what they are saying, want to be responsible for providing accurate reporting to various departments and countries, don't hesitate to apply for the position of

JUNIOR DATA ANALYST
